Subject: RE: fish and sensitive habitat information needed for EPA NPL listing of Bradford Island

Hi Jon, I'm seeking input from both, as well as Yakama Nation. If you could coordinate with the field office I would greatly appreciate it. Thanks!

Ken – Just to be clear, the Oregon Department of Fish and Wildlife is a state agency. Your request below asked for a response on “Oregon FWS” letterhead. If you are seeking input from the Oregon field office of the USFWS, I recommend you contact them directly. Please clarify whether you are seeking input from ODFW or the USFWS.

That said, your request is outside my area of influence. I included several ODFW folks in the distribution list that should be able to help you with your request. Cheers!

Jon

Hi Jon,

Just checking in on the status of a letter from Oregon FWS providing information for the EPA NPL listing package for the Bradford Island site. We are trying to get the package to HQ by the end of next week. If we could get a letter from you on FWS letterhead by early next week, that would be fantastic. The Tribe and USFWS are working on theirs – hope to have them by the end of this week. Thanks again for all the help on this! Ken

Subject: FW: fish and sensitive habitat information needed for EPA NPL listing of Bradford Island

Kalysta, Martin, & John – I’ve received recent inquiries for information about F&W in the Bradford Island area from both Ken Marcy (EPA) & Mike Greenburg (DEQ). Hopefully, you can answer the questions below that are related to your disciplines. Thanks!

Subject: fish and sensitive habitat information needed for EPA NPL listing of Bradford Island

Hi Jon,

I just left you a voicemail on this. In response to requests from Oregon DEQ, Washington Ecology and the Yakima Nation, EPA Region 10 is moving forward with the listing of the Bradford Island site (Bonneville) on the National Priorities List. In order for EPA to complete our ranking package, we need formal information from various agencies regarding threatened and endangered species, fishing, and sensitive habitat information for the “zone of contamination” (see attached figure), and areas outside and downstream of the zone of contamination. Here’s a more complete list of what we need:

Sensitive environments:

- Critical habitat for Federal or State designated Endangered or Threatened species. Specify which species including scientific name and listing status (Fed or State, Endangered or Threatened).
- Habitat known to be used by Federal or State Endangered or Threatened species. Specify which species including scientific name and listing status (Fed or State, Endangered or Threatened).
- Spawning areas critical for the maintenance of fish/shellfish species.
- Migratory pathway and/or feeding areas critical for the maintenance of anadromous fish species within the river.

Human Food Chain Organisms:

- Indicate whether recreational or subsistence fishing or shellfish harvesting occurs, including the type of fish/shellfish caught or sought. Please specifically state the caught/sought species are for *human consumption*. If any fish catch or harvest information is available for this area, please provide it (I realize this is unlikely, but asking just in case).

- If fishing/harvesting does not occur within the Zone of Actual Contamination due to a perception of contamination, please also state that and give details.

We need the information in the form of a letter on agency letterhead. This is a big ask on fairly quick timeframe – I appreciate any assistance you can provide. Please give me a call if you want to discuss further. Thanks! Ken
